Rats and cockroaches spread deadly diseases. They consume and contaminate tons of food and destroy billions of dollars in property annually. Rats sometimes bite computer wires and data cables, which cost a lot of money to repair and replace. Broken wires are also one of the major cause of electrical fires. So let's get rid of them using the chemical free technology. One commercial unit can cover up to 10,000 sq ft. Domestic units for households are also available.

HACCP APPROVED

Pest Free is endorsed as a food safe product meeting the requirements of the Hazard Analysis Critical Control Point, HACCP Australia. This product is in compliance with the standards required by The Australia Food Safety Accreditation Systems.
