Ray & Darren Connell
Pest Free Australia

SUBJECT : Reference

Dear Sirs,

I wish to let you know that International Environmental Technologies Pty Ltd was originally established in Hong Kong in the early 90's and later registered in Australia in 1995 to provide Environmental Options & Solutions to the food industry in Australia. The decision to become involved with the Pest Free products has been nothing but a pleasure.

The quality and effectiveness has been superb. Our clients have had fantastic results where other systems or methods have failed and often the last course of action has been the Pest Free Plug-in, but it never lets you down.

The scientific testing was certainly a factor in deciding whether to provide the product to our clients and as a result of this decision, we have been able to provide an alternative to chemical control of vermin in food premises throughout Australia and the system has performed well above expectation.

Our testing criteria for new products we introduce to our clients is well above Australian Standards and Pest Free certainly provides not only the Australian HASAP standard but International environmental safety standards with flying colours.

Understanding how the system works is the key to the success of the system and as such we would recommend the Pest Free Plug to any business who wishes to get control of Vermin in their property.

As a specialist organisation we pride ourselves on providing the very best, the industry has to offer with regard to performance and quality. The Pest Free systems fulfil this criteria, without exception and the performance of the system is astounding. (Not, that I can explain why)

We are pleased report that of the many hundreds we have installed only 5 have been returned for service and /or replacement after 7 years of service. We have never had a client return the units because they don't work.

Congratulations on a truly great Australian Made product and we look forward to continuing to provide the Pest Free Plug In to our clients.

Kind Regards

Ian G Jones
