Wickham NSW 2293.

14/09/2009

Attention:

Mr Ray Connell,

Dear Ray,

In approximately March 1995 I purchased 2 of your original Pest Free units for use at home, we took these units to New Zealand in April 1995 when the company I was working for sent me there to set up operations in that country.

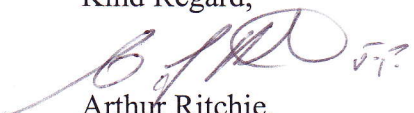

The next-door neighbours in NZ bred birds and had problems with mice and cockroaches, but thanks to Pest Free we had no problems with any type of pest at all.

On our return to Australia we lived on acreage at Black Hill in Newcastle where both Neighbours on either side kept horses, again they had problems with vermin where as we did not.

Now we live in Newcastle suburban area where my wife and I breed birds and have bush land at the rear of our property where you would expect to see either mice or cockroaches, **but my two original 1995 vintage Pest Free units are still keeping our home and property pest free.**

Ray the Pest Free product has been without a doubt one of the best products I have ever purchased and I will never be without a Pest Free product to protect my home from vermin.

Kind Regard,

Arthur Ritchie,
