

## South African Breweries South Africa

This serves as a confirmation that Rosslyn Breweries has installed the Pest Free Device in our packaging plant with great success. We had specific areas of concern with rats eating our electrical wiring. Being a high technology plant and a production environment we needed something that would eliminate the rats without interfering with the technology, Pest Free did this for us, and with no maintenance to the unit it was simply install and forget.

Thank You  
Pack Electrical Superintendent
