Mr Kung Boon Chin,

Pest free Malaysia.

Dear Mr Kung,

As long as I could remember, I have engaged several pest control companies to rid my house of pest infestation. By using chemicals, the companies were partly successful in getting rid of cockroaches but only for a month or two after which infestation would resume and I have to call the companies again.

Several rats have made home in the ceiling of my house and the chemicals do not seem to work on them. Occasionally they could be heard running about the ceiling creating nuisance disturbing our sleep especially at night. I have tried to trap and glue them but to no avail.

When you introduced the Plug-in Pest Free product to solve my rat problem, I was a bit apprehensive. But thanks to you, after using the product for a month, there are no more noise coming from the ceiling. As for the cockroaches, I have not encountered any since installing the Pest Free product in my house.
