To: Mr Christopher Kung  
Pest Free Malaysia.

Dear Sir,

**Ref: Plug In Pest Free-Domestic**

I had purchased 1 unit of Pest Free Domestic about six months ago after looking for such device for sometime. My family and friends had been doubtful about whether such device works and ask me not to waste money.

After, taking delivery and plug in the main for about 2 weeks, there was almost a non-existence of cockroaches and rats. We also noticed that lizards ( my daughter had a phobia) had gone hiding behind the cupboards and pictures' frames and disappear altogether later. We also noticed that when there was a power blackout, the lizards return and that prove that Pest Free does worked when we plug in.

Since then with the results, my doubtful friends had asked me to order for them and also getting wonderful results of NO PESTS.

Yours truly,
